

Model #136

The MAG LEAD™

Multiple Patents Pending

- Need to stick to a good ground or test point? Get the **Mag Lead**, a great new product.
- **Mag Lead** features a magnetic disconnect near the test probe end.
- Just disconnect the test probe and you can “stick” to any metallic ground or test point.
- Quit fumbling with alligator clips that fall off - Mag Lead’s powerfull magnet will hold tight!
- **This is a time saving tool** - if you don’t have to walk to your tool box to retrieve your alligator clips, even on just half the occasions, then you’ve saved time.
- Very helpful for automotive reference points and troubleshooting.
- Can eliminate the need to hold probes while checking or monitoring a signal.
- Two high power, low resistance magnets hold the probe to the lead.
- Fits almost all Digital Multimeters and can be used with hand-held scopes too.
- Get the **Mag Lead**, it stays put and won’t fall off, like alligator clips do!

Applications:

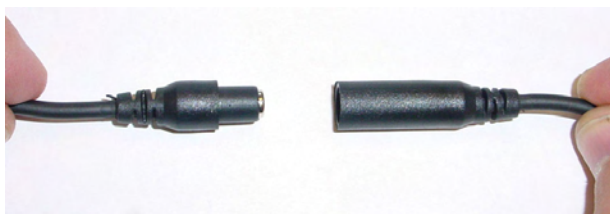

- Automotive
- Industrial
- HVAC
- Electrical
- Marine

It's as easy as 1, 2, 3!

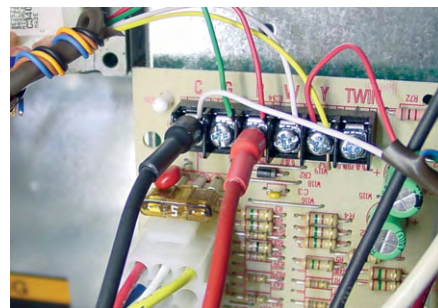

1. Two high powered, low resistance magnets hold the probe to the lead.

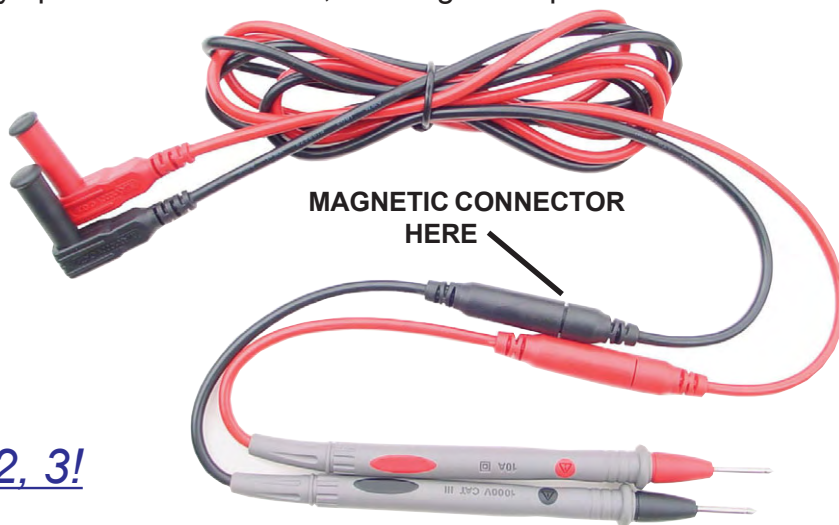

2. Pull the magnetic connector apart....

3. The magnet holds the lead to the Test Point!

4. Now your meter has a low resistance connection to the Test Point - - Hands Free!!!

PROFESSIONAL HAND HELD TEST EQUIPMENT
